Summary

Bachelor's student in ML and **computer vision**, worked on 2 MRI detection projects analyzing 1,200+ images using CNNs. Skilled in Python, data analysis, model evaluation, and **self-taught via YouTube and technical blogs**. Continuously learning advanced AI techniques, motivated to pursue a research-focused Master's in applied AI.

Skills

Programming & Querying: Python, JavaScript

IDE: VS CODE, GOOGLE COLAB

Data Visualization Tools: Matplotlib, Seaborn

Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA)

Education

B.Sc. Computer Science 2027

Karakoram International University

Expected-Graduated:

CGPA: 3/4

Main courses

- Programming Fundamentals / Computer Programming (essential coding skills)
- Data Structures and Algorithms (key for AI problem solving)
- Discrete Mathematics (math foundation for AI)
- Probability & Statistics (underpins machine learning)
- Linear Algebra (important for ML & neural networks)
- Artificial Intelligence (intro to AI techniques)

Experience

Frontend Development | Triangle Technologies | React JS

March 2022 – April 2024

- **2+ years of experience** building frontend interfaces for 13+ blockchain projects, including dApps, dashboards, and Web3 platforms.
- Designed smooth wallet connection, smart contract interaction, and onboarding flows to improve user experience and trust.
- Analyzed user behavior and optimized UI to reduce drop-offs and increase engagement for business growth.

Intern | Lincoln Corner Gilgit | American Spaces | US Embassy Project

March 2022 – April 2024

- **Completed a 6-month internship at Lincoln Corners**, attending 20+ workshops and events focused on communication, research, and leadership.
- Collaborated with 10+ team members on 8+ presentations and projects, strengthening teamwork and problem-solving skills.
- Supported AI research activities through data collection, documentation, and structured analysis during my bachelor's studies.

Projects

Sentiment Analysis App | Python and React

March 2025 – April 2025

- **Analyzed behavior of 7,043 telecom customers** to identify churn patterns based on tenure, contract type, and monthly charges.
- Engineered new features including contract type buckets and tenure bands to improve segmentation and insights.
- Generated 11 visualizations (histograms, box plots, heatmaps) to highlight churn-prone segments.
- Revealed that 38% of churned users were on monthly contracts with less than 3-month tenure suggested early engagement strategies.

Awards & Certifications

- **Scientific Research Course (2024)** 24-hour training in research methods, data analysis, and academic writing.
- **Meta Frontend Development – Coursera (2024)** Trained in HTML, CSS, JavaScript, React, and responsive UI for real-world web apps. <https://coursera.org/verify/8UJ2YHZZHPK5>
- **Programming with JavaScript – Coursera (2024)** Learned core JS, DOM manipulation, and async programming for frontend development. <https://coursera.org/verify/78LC867BDR5Y>
- **Meta Version Control – Coursera (2024)** Hands-on experience with Git, GitHub, branching, and team collaboration. <https://coursera.org/verify/T5JNEFYZBDP6>
